Backend Developer for 4 years my experience is based on .NET and SQL SERVER. I'm willing to learn new technologies. I am characterized by being self-taught and in constant professional and personal growth. Regarding Frontend Developer I have +2 of experience with Vanilla JavaScript and React.JS (constantly learning). I am improving REACT.JS, .Net and SQL Server. I am currently working with .NET specifically WPF under the MVVM pattern. I'm looking for a remote and international job, and I would prefer a job as a backend developer but if the opportunity is related to Frontend, I'll take it without hesitation. Certified AWS Cloud practitioner.

EXPERIENCE

IA INTERACTIVE

Backend Developer (Cinepolis) - *Current.*

- Be in charge of the legacy code for Chile, Mexico and Spain. New features and bugs that come out along the different transactions.

Tech Stack: .Net, Jira, Confluence, Git, .Net.

IA INTERACTIVE

Developer (Cinepolis) - *Current.*

- Currently one of my main functions apart from my role as Developer, is to be in charge of deployments and Merge to the main branches, these deployments apply to Mexico, Chile and Spain.
- Be in charge of the legacy code for Chile, Mexico and Spain. New implementations and bugs that come out along the different transactions.

Tech Stack: AWS, WinsSCP, Jira, Confluence, Git, .Net.

IA INTERACTIVE

Frontend Developer (Cinepolis) — *October 2023, – November 2023.*

- For the Chile application I developed a module to encrypt the RUT (identification number) or the cinepolis card number to continue the flow of purchases.
- Also a refactor was made to send the orders to the order table, dynamically changing the endpoints from the kiosk configuration menu.

Tech Stack: .NET (WPF), Jira, Confluence, Git.

IA INTERACTIVE

Frontend Developer (Cinepolis) — *July 2023, – October 2023.*

- In this project, I have been working on a React project to rebuild Cinepolis Web so Mexico, Chile and Spain.
- Build new features to implement new promotion on the web.
- Build new features to improve the web.

Tech Stack: React, Typescript, Jira, Confluence, Git.

IA INTERACTIVE

FullStack Developer (Cinepolis) — *March, 2023 – Current.*

- Build new features to improve the app.
- Maintain the .NET application (WPF).
- Change methods for accessing the different endpoints used by the application.

Tech Stack: .NET, SQL SERVER, BITBUCKET.

IA INTERACTIVE

FullStack Developer (Cinepolis) — *December, 2022 – March 2023.*

- In this project, I have been knowing the API and the CMS of Cinepolis Mexico and Cinepolis Spain.
- Delete obsolete functionality of the application, both front and back end.
- Build new features to improve the app.
- I have learned to use Gitflow and Atlassian.

Tech Stack: .NET, SQL SERVER, GIT, BITBUCKET.

T&M CONSULTING

Backend Developer (HEICREDIT) — *August, 2022 – December 2022.*
- Database Update. SQL SERVER.
- Construction of the models and controllers for the correct operation of the API.
- In this project, I have built part of the API, specifically some models and controllers of the project, I also implemented the automatic mailing through Send Grid.

Tech Stack: .NET, SQL SERVER, GIT, GITHUB.

Backend Developer (AMSTEL VERANO REFRESCANTE) — *June 2022 – August 2022.*
- Construction of the database modeling with SQL SERVER.
- Construction of the models and controllers for the correct operation of the API.
- In this project, I had the responsibility to build an API that could add register new user and that they could have the opportunity to choose between some campaigns offers by AMSTEL. For this, I worked on building models and controllers that would help me to fulfill all the required processes.

Tech Stack: .NET, SQL SERVER, GIT, GITHUB.

Backend Developer (HEICREDIT) — *March, 2022 – May, 2022*
- Construction of part of the database modeling with SQL SERVER.
- Construction of the models and controllers for the correct operation of the API.
- In this project my accounting knowledge helped to unlock the continuation of the project, as one sprint was based on a financial calculator. And the construction of the models and controllers that corresponded to me helped to minimize the delivery time of the project.

Tech Stack: .NET, SQL SERVER, GIT, GITLAB.

Backend Developer (AMSTEL ULTRA) — *May 2021 – February, 2022*
- Construction of part of the database modeling with SQL SERVER.
- Construction of the models and controllers for the correct operation of the API.
- With my contribution we were able to reduce the project delivery times.

Tech Stack: .NET, SQL SERVER.

Frontend Developer (BAR EN CASA) — *January 2021 – June, 2021*
- Modification of the main view of the project BAR EN CASA with liquid SHOPIFY.
- Construction of the models and controllers for the correct operation of the API.
- With my contribution we were able to reduce the project delivery times.

Tech Stack: JavaScript, Liquid, .Net, GIT.

Trainee Backend Developer — *September 2020 – December 2020*
- Read the documentation about an API in .NET.
- Add refresh feature in the new item section of the platform, in addition to the redirection to the home page.

Tech Stack: .NET, SQL SERVER.

PROJECTS

Freelances Projects –

CONVFACT C.A. March 2023-May 2023
- I made a project which able to receive the user's incoming and expenses invoices, and order them chronologically, at the same time check by date line, generate graphs and financial statement of profit and loss. Tech Stack: REACT JS, NET, SQL Server, GIT, GHITHUB.

https://convfact.com. March 2023-May 2023
- This was a project of a couple months for a company in Tenerife, Spain, in which I had to build some models to be able to use them with the Spain tax administration, since this is a financial app, I also had to make some tables in SQL Server. **Tech Stack:** .NET, SQL Server, GIT, GHITHUB

SKILLS

Programming Languages: Intermediate: **JavaScript.**

Frameworks and Tools: Intermediate: **REACT.JS, .NET, SASS, GIT.**

Data Base: Intermediate: **MySQL, SQL SERVER.**

Agile: SCRUM

Other: Intermediate: **HTML, CSS.**
